

San Diego County

Entomology Newsletter

Glassy winged sharpshooter by S. Carr

SPRING 2022

VOL. 1, ISSUE 4

Lab Updates & Acknowledgements

The newsletter is paused this quarter due to Agricultural Scientist Dr. Bodil Cass being on parental care leave. Thank you to everyone who is keeping the Lab and Apiary Program running while she is away, especially Ceres Phillips, Tyler Tkachuk, Bill Walsh, Aprille Geier, Jaime Garza, Sierra Wolf, Jasmine Lopez, Bonnie Wheeler, and Jason Schwartze.

The team welcomed the newest honorary Lab member with a lunch and generous gift of meal vouchers, a basket of bug-themed books, and bug-themed clothes — including this ‘Smash it!’ outfit, helping get the word out about Spotted Lanternfly.
